- **Wireless transfer**
- **FCC licensing**

History and Future

Complete Wireless Technologies, formed in 1991, was first named 'The Pager Clinic' due to the tremendous volume of paging repairs we received from around the country during the paging boom of the '90's.

Even with the decline of the pager industry, we still remain strong and ever growing taking, not only pager, but radio repairs from all over the country. The large majority of our customers come from government agencies, public safety organizations, private industry, and other communication companies who don't have the onsite technical expertise we can provide.

In House Repairs

Complete Wireless Technologies is equipped with highly trained radio repair technicians with years of experience and top of the line equipment. We can do all repairs for every major manufacturer of radios or pagers from Motorola, Kenwood, Vertex, Icom, Bendix King, and much more. Since we handle thousands of repairs from all over the country, we are able to keep a large stock of parts on hand.

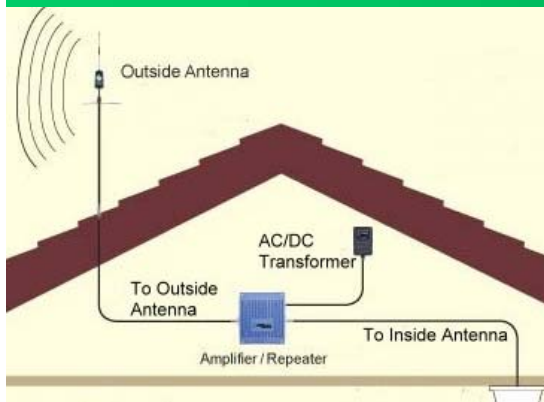

On Site Tower Repair

Complete Wireless Technologies is able to install any radio or paging system along with any onsite tower repair whether you are having antenna or coaxial problems or whether you need to repair or add a tower to your existing site.

Building & Onsite Coverage

Whether you are having problems communicating in your building or job site locations either by 2-way, paging, or cellular, Complete Wireless Technologies can provide you with the solutions which would best suit your needs.

Headset Intercom Systems

In noisy environments, having the proper noise canceling headset equipment is a must. That's why Complete Wireless Technologies provides complete sales, service, and installation of all headset intercom systems regardless of what type of vehicle or application is being used.

Remote Monitoring

Remote monitoring can be essential when you need to have important equipment looked after in a remote location where you cannot have someone around twenty-four seven. Remote monitoring your equipment will allow you to be immediately contacted to alert you of any problems and can allow you to correct the problem by the touch of a button.

Wireless Transfer

You can more cost effectively process data or video from one point to another whether it is 10 feet or 10 miles by using wireless transfer. Complete Wireless Technologies can evaluate and implement the correct wireless application for your data or video needs.

FCC Licensing

In need of adding frequencies and channels to your existing radio system or are you looking to getting yourself your first radio license? Let Complete Wireless Technologies handle all of the paperwork and filing with the FCC to ensure you get the frequencies you need and in a timely fashion.

Complete Wireless Technologies

There is only one place you need to go for all of your wireless needs.
